CURRENT SERIALIZED RECORDS

Vol. VI, No. 2

February 1962

JANUARY UNIFORM PRICE \$3.92

Dairy farmers will receive a uniform price of \$3.92 for January 1962 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.3 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge.

PRODUCER RECEIPTS

Average daily production per producer has increased 13 pounds over the December 1961 delivery period, and is also 30 pounds more than it was a year ago. The daily increase in producer receipts is 2.32 percent over December, while a year ago the production was up 5.7 percent over the previous month. Extremely cold weather and large amounts of ice and snow have undoubtedly kept production from increasing at the rate it increased in January of 1961.

CLASS I SALES

The summary shows that Class I sales increased over December by 3.5 percent on a daily basis. The increase was more than the production increase, so, consequently, we had a 73.2 percent Class I utilization of producer receipts, whereas in December 1961, we had only 72.2 percent Class I utilization. The settlement of a labor strike should improve the Class I sales figures for February 1962.

ORDER NEWS

A recommended decision of the Assistant Secretary of Agriculture with respect to proposed amendments to 36 mid-western marketing orders was mailed to interested parties. This amendment pertains to changing the basic formula and alternative formulas used to make up the basic formula price to the Wisconsin-Minnesota manufacturing price series as the basic formula price in all of these markets. One of the reasons for this amendment is that uniformity of basic formulas is desirable for aligning prices among related markets. Exceptions to this decision have to be mailed to Washington, D. C. by February 15, 1962.

CLASS I PRICE

The Class I price for the February 1962 delivery period will be \$4.18 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.10 per hundredweight to the average condensery pay price (\$3.18) and subtracting the 10 cent supply-demand adjustment. The supply-demand adjustment for the March 1962 delivery period will be a minus 10 cents.
